SUMMARY

Full stack software engineer with 6+ years of experience building distributed systems, cloud-native applications, and data platforms across AWS and Azure. Currently at GEICO developing production AI capabilities, segmentation platforms, and marketing analytics systems, and previously shipped enterprise features at AWS used by 10,000+ customers. Experienced in Java, Python, React, microservices, event-driven architecture, and AI-integrated systems.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript

Frontend & Backend: React, Angular, Spring Boot, Node.js, GraphQL, REST APIs

Cloud & Infrastructure: AWS (EC2, ECS, S3, Lambda, SQS, EventBridge, CloudWatch), Azure, Docker, Kubernetes

Data, Streaming & Databases: Apache Kafka, Apache Flink, Snowflake, MySQL, DynamoDB, Neo4j

AI, Visualization & DevOps: Snowflake Cortex, Claude API, DataRobot, Power BI, Streamlit, JUnit, Jest, CI/CD, Git

Practices: Agile, TDD, Microservices Architecture, Event-Driven Systems

EXPERIENCE

Software Engineer II | GEICO | Kirkland, WA

Dec 2024 - Present

- Built and deployed Segment Genie, a production AI-powered NL-to-SQL chatbot using Snowflake Cortex, enabling developers, product managers, and marketing teams to query 30M+ customer records and reduce campaign audience build time from ~3 hours to under 15 minutes.
- Implemented a real-time anomaly detection and alerting system using Apache Flink, processing 100K+ marketing workflow events/day and reducing mean time to detection of pipeline failures by ~40%
- Created a full-stack audience segmentation platform (React, TypeScript, Java) supporting 12+ marketing analysts, improving self-serve capability and reducing data team dependencies by ~30%
- Developed backend services and data access layers for audience segmentation workflows, integrating Java APIs with Snowflake-backed datasets across 30M+ customer records and improving reliability for production campaign operations.
- Mentored 2 intern engineers through structured onboarding, code reviews, and system design walkthroughs

Software Engineer | DataSenseIT | Redmond, WA

Sept 2024 - Dec 2024

- Developed GraphQL APIs and reusable React components for a B2B data visualization platform serving 200+ users, reducing query latency by ~35%
- Improved dashboard UX via performance profiling and lazy-loading, reducing time-to-first-insight by ~25%

Software Development Engineer | Amazon Web Services (AWS) | Seattle, WA

Jun 2022 - Jul 2024

- Designed and shipped cross-region SSO and adaptive UI rendering for AWS Systems Manager Fleet Manager, used by 10,000+ enterprise customers globally, eliminating manual multi-account login workflows and contributing to ~\$240K in annual cost savings
- Built event-driven Java microservices with Kafka and AWS EventBridge, enabling asynchronous cross-service communication across Fleet Manager workflows handling millions of API calls/month.
- Developed Python REST APIs for real-time user interaction analytics, powering Fleet Manager usage dashboards used by internal AWS product teams to track adoption and feature engagement.
- Achieved 93% unit and integration test coverage using JUnit and Jest; stabilized UI canary tests blocking production deployments, reducing rollback rate by ~20%
- Improved CI/CD pipeline reliability, decreasing average build-to-deploy cycle time by ~15% and increasing deployment confidence across the team
- Mentored 3 new engineers through structured onboarding programs and knowledge transfer

Frontend Developer | Artivatic Data Labs | Bengaluru, India

Jun 2020 - Dec 2020

- Led frontend development for 3 insurance product UIs (Angular, TypeScript) with SSO and RBAC for 5,000+ users, improving load performance by 40% through code splitting

Software Engineer | Bizense Software Technologies | Bengaluru, India

Aug 2018 - Apr 2020

- Built and launched Audience Platform 2.0 dashboard serving 100K+ MAUs, improving user engagement by ~20% and reducing report generation time by 30%

EDUCATION

Master of Science, Computer Science - University of North Carolina at Charlotte | GPA: 3.9 / 4.0
